

Understanding the problem space

- What do you want to create?
- What are your assumptions?
- Will it achieve what you hope it will?

What is an assumption?

- taking something for granted when it needs further investigation
 - e.g. people will want to watch TV while driving

What is a claim?

- stating something to be true when it is still open to question
 - e.g. a multimodal style of interaction for controlling GPS — one that involves speaking while driving — is safe
