

Perception

- How information is acquired from the world via different sense organs (eyes, ears, fingers) and transformed into experiences of objects, events, sounds, and taste (Roth, 1986)
- Obvious implication is to design representations that are readily perceivable, e.g.
 - Text should be legible
 - Icons should be easy to distinguish and read

Activity

- Weller (2004) found people took less time to locate items for information that was grouped
 - using a border (2nd screen) compared with using color contrast (1st screen)
- Some argue that too much white space on web pages is detrimental to search
 - Makes it hard to find information
- Do you agree?

Which is easiest to read and why?

What is the time?

What is the time?

What is the time?

What is the time?

What is the time?

Design implications

- Icons should enable users to readily *distinguish* their meaning
- Bordering and spacing are effective visual ways of grouping information
- Sounds should be audible and distinguishable
- Speech output should enable users to distinguish between the set of spoken words
- Text should be legible and distinguishable from the background
- Tactile feedback should allow users to recognize and distinguish different meanings
