

Emotions and the user experience

- HCI has traditionally been about designing efficient and effective systems
- Now more about how to design interactive systems that make people respond in certain ways
 - e.g. to be happy, to be trusting, to learn, to be motivated
- Emotional interaction is concerned with how we feel and react when interacting with technologies

Is this form fun to fill in?

“My goal was to design Wufoo to feel like something Fisher-Price would make.”

- Kevin Hale, Wufoo director

The image shows a screenshot of a Wufoo online form titled "Customer Satisfaction Survey". The form has a red header with the Wufoo logo. Below the header, the title "Customer Satisfaction Survey" is followed by the instruction "Please take a few moments to complete this satisfaction survey." The form contains four sections of questions, each with radio button options:
