

Why go to this length?

- Help designers:
 - understand how to design interactive products that fit with what people want, need and may desire
 - appreciate that one size does not fit all
 - e.g., teenagers are very different to grown-ups
 - identify any incorrect assumptions they may have about particular user groups
 - e.g., not all old people want or need big fonts
 - be aware of both people's sensitivities and their capabilities

Are cultural differences important?

- 5/21/2015 versus 21/5/2015?
 - Which should be used for international services and online forms?
- Why is it that certain products, like the iPod, are universally accepted by people from all parts of the world whereas websites are reacted to differently by people from different cultures?

Accessibility

- Degree to which a product is usable and accessible by as many people as possible
- Focus on disability:
 - Have a mental or physical impairment
 - This has an adverse affect on their everyday lives
 - It is long term

Anna, IKEA online sales agent

- Designed to be different for UK and US customers
- What are the differences and which is which?
- What should Anna's appearance be like for other countries, like India, South Africa, or China?

Figure 1.7 Anna the online sales agent, designed to be subtly different for UK and US customers. What are the differences and which is which? What should Anna's appearance be like for other countries, like India, South Africa, or China?
