

Data Mining: Confluence of Multiple Disciplines

Why Confluence of Multiple Disciplines?

- ❑ Tremendous amount of data
 - ❑ Algorithms must be scalable to handle big data
- ❑ High-dimensionality of data
 - ❑ Micro-array may have tens of thousands of dimensions
- ❑ High complexity of data
 - ❑ Data streams and sensor data
 - ❑ Time-series data, temporal data, sequence data
 - ❑ Structure data, graphs, social and information networks
 - ❑ Spatial, spatiotemporal, multimedia, text and Web data
 - ❑ Software programs, scientific simulations
- ❑ New and sophisticated applications
