

Statistics of Data

- ❑ Measuring the Central Tendency
- ❑ Measuring the Dispersion of Data
- ❑ Covariance and Correlation Analysis
- ❑ Graphic Displays of Basic Statistics of Data

Basic Statistical Descriptions of Data

□ Motivation

- To better understand the data: central tendency, variation and spread

□ Data dispersion characteristics

- Median, max, min, quantiles, outliers, variance, ...

□ Numerical dimensions correspond to sorted intervals

- Data dispersion:

- Analyzed with multiple granularities of precision

- Boxplot or quantile analysis on sorted intervals

□ Dispersion analysis on computed measures

- Folding measures into numerical dimensions

- Boxplot or quantile analysis on the transformed cube
