

MaPle: Efficient Enumeration of δ -pClusters

- ❑ Pei et al., MaPle: Efficient enumerating all maximal δ -pClusters. ICDM'03
- ❑ Framework: Same as pattern-growth in frequent pattern mining (based on the downward closure property)
- ❑ For each condition combination J , find the maximal subsets of genes I such that $I \times J$ is a δ -pClusters
 - ❑ If $I \times J$ is not a submatrix of another δ -pClusters
 - ❑ then $I \times J$ is a maximal δ -pCluster
